

Surveyor - Land/Inland Hydrographic

Storm Geomatics Limited is a specialist survey company that concentrates its resources in surveying for the water engineering business. Our company has built a reputation amongst consulting engineers as being one of the leaders in the capture of geo-referenced data for river and flood plain modelling, still water surveys, environmental surveys, and water based construction. Storm Geomatics are looking to scale up their operations, increase capacity and move into new and previously undiscovered markets.

We are looking for a dynamic team player to join our company as a surveyor or senior surveyor. You will be responsible for undertaking large/complex surveys and managing multiple teams. You will be responsible for bringing together the entire project ready to hand over for QA. You will liaise with the client and our survey managers to provide the very best survey deliverables which are fit for purpose and the best use of our clients budgets. Your work will be split 50/50 site/office with opportunity to progress your career within a growing company.

The majority of our projects are based on the following:

- River Channel Cross Section Surveys
- Still Water Surveys
- Near Shore/Coastal Surveys
- Setting Out
- Topographic Surveys
- River Condition Assessments

The successful applicant would ideally be able to complete the following:

- Complete all survey operations without guidance.
- Undertake large complex survey tasks managing multiple teams.
- Develop new ways of working and innovate to increase productivity.
- Liaise with clients to develop specification to enhance client deliverables that are fit for purpose.
- Liaise with clients over problems and issues concerning surveys.
- Been a surveyor for a minimum of 3 years.
- Always be prepared to go above and beyond the role as a surveyor to meet deadlines and enhance the reputation of Storm Geomatics.
- Have an in-depth knowledge of surveying tasks to a level where teaching others with confidence is possible.
- Proven record of self-improvement and development.
- Fully understand the commercial aspects of the business and associated financials.
- Actively assist surveyors and trainees in their knowledge development.
- Show constant profit margins as project lead.
- Set an example to others of hard work, dedication and positive mind set.
- Be a MCInstCES/equivalent or very close to completion.
- Continue to self-learn and develop survey/water based knowledge.
- Strive to promote Storm Geomatics as the leading survey company in the UK.

The successful applicant would ideally have the following attributes:

- Be Physically fit
- A real team player with aspirations to grow within the company
- High level understanding of technology and computers
- Be able to work away from home on weekdays
- Hold a full clean driving licence
- Be able to speak fluent English
- Be able to swim
- Be able to work on your own initiative

We will be offering a good package to the successful applicant to include a good salary, fully paid overtime, overnight inconvenience payment, company phone, company vehicle, work place pension, company bonus scheme awarded quarterly (if thresholds met), long service awards and the chance to progress your career and gain a professional qualification within the surveying industry.
